You are receiving this statement as an account owner or as a trust beneficiary who is entitled to receive statements, or as a party who is authorized to receive statements. Please contact us if you have any questions regarding your statement, or if you have a change in address, phone number or other information. We have provided some definitions to assist you in understanding this statement.

Definitions

Acquisitions: Purchase or receipt of assets, including money market funds.

Asset Allocation: A pie chart with percentages that shows the breakdown of the various asset classes in the account.

Bond Maturities Schedule (in years): Short - 1 to 3; Intermediate - 3 to 7; Long - 7 +

Capital Gain / (Loss): The difference between sale proceeds and cost basis. A gain or loss may be short or long depending on the holding period (long is greater than one year).

Cash & Equivalents: Cash, money market funds, treasury bills and other short-term investments.

Corporate Actions: Change due to mergers, stock splits or other capital reorganizations.

Cost Basis: Net cumulative cost of the asset. Often referred to as tax basis or tax cost. The original value of an asset for tax purposes (usually the purchase price), adjusted for sales, stock splits and purchases, including reinvestment of dividends and capital gains distributions. Tax lots for a security may be obtained from the account administrator or online.

Dispositions: Sale, maturity, or delivery of assets.

Estimated Annual Income ("EAI"): The gross income an asset is projected to earn annually, expressed in dollars – as of the date of the statement.

Estimated Yield ("EY"): When available, the EAI of the security divided by its market value. Note: EAI and EY are estimates; actual income and yield may be lower or higher. Estimates may also include return of principal or capital gains, which would render them overstated. EY reflects only the income generated by an investment; not changes in its price. These figures are based on mathematical calculations of available data. They have been obtained from information providers believed to be reliable, but no assurance can be made as to accuracy. Since interest and dividend rates are subject to change at any time, and may be affected by current and future economic, political and business conditions, they should not be relied upon for making investment, trading or tax decisions.

Historical Value: A bar graph depicting the value of the account over a period of time.

Market Appreciation / Depreciation: Change in market value from the end of the previous period to the end of the current period.

Market Overview: A summary of the activity that has occurred in the account during the current period and year-to-date.

Market Value: An approximation of the total worth of an asset, obtained by multiplying the unit price by the number of shares/units as of the statement date. The market value of a security, including those priced at par value, may differ from its purchase price and may not closely reflect the value at which the security may be sold or purchased based on various market factors.

Prices: Prices are as of the statement date. For exchange traded securities, the price at which a security is traded. For non-exchange traded securities, the price is an estimate of the value of the asset. Prices are obtained from various sources and may be impacted by the frequency in which such prices are reported; therefore, such prices are not guaranteed. Prices received from pricing vendors are generally based on current market quotes, but when such quotes are not available the pricing vendors use a variety of techniques to estimate value. These estimates, particularly for fixed income securities, may not reflect all of the factors that affect the value of the security, including liquidity risk. The prices provided are not firm bids or offers. Certain securities may reflect "cost basis" where the price for such security is generally not available from a pricing source.

Ratings: Ratings from Moody's and S&P are displayed, if available. If no rating is displayed, the security is not rated by those institutions.

Settlement Date: The date a transaction is finalized.

Statement of Accruals: Dividends and interest that have accrued but have not been paid. When the statement date falls between the record date and a payment date of a dividend, the dividend is reported on the statement of accruals. Interest that has accrued on a bond from the last date of payment until the statement date is reported on the statement of accruals.

Tax-exempt: Refers to federal tax only. This information is believed to be accurate but may not apply to your particular tax situation. Consult your tax advisor.

Trade Date: The date at which an agreement was entered to conduct a transaction. Trade date statements have been adjusted for payables and receivables.

Transaction Schedule: Report of transactions made during the statement period.

Unrealized Gain / (Loss): A gain or loss that has not become actual; a realized gain or loss occurs when the asset is sold.

Yield - Equities: EAI divided by market value.

Yield - Fixed Income: Yield to maturity.
